PARROT MKI-9200 Specifications

Model

PARROT MKI-9200

Notes

The Parrot MKi9200 is a Bluetooth hands-free system with a 2.4-inch high-resolution TFT colour screen. A wireless remote control can be positioned on the steering wheel or dashboard and allows the driver to control all the functions of the MKi9200.

In addition to conventional telephony functions - pick up, hang up, dual calls - the Parrot MKi9200 boasts cutting-edge telephony functions: automatic phonebook synchronisation, training-free multi-speaker voice recognition, speech synthesis of the names in the phonebook, contact management (up to 2 000 per phone), call records, and so on.

Its colour screen displays the phonebook, caller ID and photo, phone information and user settings. The menus and phonebook are also audible for easier, more intuitive use.

The Parrot MKi9200 is also gifted for music. Supplied with a specific cable, it is compatible with all music sources, such as iPods, iPhones, USB flash drives, Bluetooth stereo (A2DP) phones, MP3 players and any other analogue players. The Parrot MKi9200 also features an SDHC-compatible SD card reader on the side of the screen.

The MKi9200 displays the full playlist along with the name of the artist, the title and even the corresponding album cover in colour when available on the iPod, iPhone or USB flash drive.

Music is delivered through all the car's speakers*, giving the driver and passengers exceptional sound quality and the breathtaking Virtual Super Bass and Sound Specialize effects.
